

## **Job Description: Senior DevOps Engineer**

EOX Vantage is a software product company. Our patent pending Enterprise Business Operating System (EOS) is a business operating system that is recognized by Gartner as an industry changing software.

EOX provides value across different industries and has been adopted by companies like Amazon, Mercedes Benz, Tokyo Marine, Subaru etc. We are growing fast and are set to make a difference in the industry as the market leaders. In a short time, we have grown to over 40 customers and 75,000 users.

Our team is young, energetic, highly talented. We think of our team as the EOX family and are excited to build a game changing product on cutting edge technology. In fact, we operate the entire organization as a game. This is imbued to get the competitive spirit amongst the employees. Here in EOX we do things differently; We do not follow the old-fashioned hierarchy, instead we work in dozens of self-sufficient, autonomous teams. Each team picks the problems they want to solve; no hiding behind fancy job titles and no one tells you what to do. Here, you are your own boss. But, you will get plenty of support from super talented and smart colleagues. We are going to be upfront; the way we work may not suit everybody but if freedom, autonomy, and life affirming, head scratching professional challenges comes your way, we could be the best match.

Our product is built on open source LAMP stack in a micro services-based architecture.

We are looking for talented, experienced, enthusiastic leaders to help guide our team in various positions. Want to be a part of this exciting movement? Join our team; We are hiring the best, Come build the next generation high tech.
